Summary

AI Engineer passionate about building intelligent applications with LLMs, RAG, LangChain, and Python. Experienced in full-stack development using React and Node.js, with a strong foundation in data analytics, SQL, Power BI, and scalable backend systems.

Education

Bachelor of Technology — Information Technology

Oct 2022 – Jul 2026

Maharaja Surajmal Institute of Technology, Delhi

GPA: 7.55/10

PM Shri Kendriya Vidyalaya NFC Vigyan Vihar, Delhi

10th: 91% (2019) | 12th: 89% (2021)

Experience

Delhi Metro Rail Corporation (DMRC)

Delhi

IT & Data Analyst Intern

11th June 2025 – 30th July 2025

- Analysed **66 M+** ATS transactions (**256GB dataset**) and built a Power BI dashboard tracking revenue, passenger distribution and station-wise trends across the Delhi Metro network.
- Built **Python/Pandas ETL pipelines** and optimised **SQL** queries ensuring reliable data extraction across **256GB** operational datasets

Centre for Railway Information Systems (CRIS)

Delhi

Software intern

4th July 2024 - 7th August 2024

- Built responsive UI components, navigation flows and data visualisation dashboards for the UTS platform using Flutter, Dart and Go Router.
- Implemented Excel/PDF export functionality and managed backend data integration using Node.js and MySQL within an **Agile workflow** including **sprint** planning and code reviews.

Projects

Finance Manager AI | Python · FastAPI · Embeddings · Transformer/LSTM (TensorFlow) · yFinance

- Initiated and researched the concept and drove the model direction** — the team moved from an LSTM to a **Transformer** to overcome **vanishing-gradient** limitations on long sequences, forecasting on 5 years of market data.
- Owned the conversational AI layer** — built the chat interface with **embedding-based context retrieval** and the **React frontend**, turning model forecasts into a real-time, interactive analysis tool.

ATS Analytics Dashboard | Power BI · PostgreSQL · Python · SQL

- Visualised **66 Million+** metro transactions across revenue, passenger type, and station-to-station flows; built on abstracted dataset due to **256GB** scale.

CareerPilot AI — AI Resume Coach & Interview-Prep Platform | React · Node/Express · MongoDB · LangChain ·

LangGraph · RAG · Vector DB (Qdrant) · LLMs

- Built a full-stack AI platform that parses resumes, embeds them into a vector store, and uses **RAG** to chat with the resume, score it against a job description (**ATS score**), and surface skill gaps with a learning roadmap.
- Designed the multi-step AI workflow with **LangChain/LangGraph** and integrated OpenAI/Gemini; React + Recharts frontend for scores and insights.

Technical Skills

AI & GenAI: Python · LLMs (OpenAI, Claude, Gemini) · Prompt Engineering · RAG · LangChain · LangGraph · Vector Databases (Qdrant) · Embeddings · Agentic Workflows.

Languages: TypeScript · Python · SQL · JavaScript.

Fullstack: React.js · HTML5 · CSS3 · Tailwind CSS · Node.js · REST APIs.

Data & Backend: MongoDB · PostgreSQL · Data Analysis · PowerBI · JSON · FastAPI.

DevOps & Automation: Docker · GitHub · CI/CD · Linux · Postman (API testing) · Unit Testing · Git.

CERTIFICATIONS & EXTRACURRICULAR ACTIVITIES

- Oracle** — Agentic AI Certified Foundations Associate (2026)
- IBM SkillsBuild** — Data Fundamentals (2026)
- AWS Cloud Practitioner Essentials** — AWS Training & Certification (2025)
- Google Analytics for Beginners** — Google Analytics Academy (2026)
- Led discipline operations and crowd coordination at Avenesis, MSIT's largest annual technical fest.
